

NRF2 Prognostic Divergence Stratified by Tobacco Smoking History

Assessing NRF2 pathway impact across ROS-exposed vs non-exposed microenvironments

Smokers (Current & Reformed)

n = 156 patients (75 events)

NRF2 Activity  NRF2-Low  NRF2-High

Lifelong Non-Smokers

n = 63 patients (21 events)

NRF2 Activity  NRF2-Low  NRF2-High
